

Research**RAMPS AND SCOOTERS**

Folding Wedges [southpawenterprises.com]:

Common to most therapy rooms, wedges help in adaptive positioning to control muscle tone and develop dynamic movement patterns in a client. By creating our new Folding Wedges, you can easily turn your wedge into a square block. Made of a firm, solid foam core and covered by an easy-to-clean, durable vinyl cover, our wedges are manufactured with the same industrial quality as all of our other products. (\$150-\$209)

Scooter Backrest [southpawenterprises.com]

Therapists asked us for a positioning device to aid gravitationally insecure & lower functioning clients, while working on our scooter board. This padded, contoured backrest comes complete with two soft straps to help aid in positioning, and attaches easily to all of Southpaw's scooter boards. It can be attached from within 6" of the front to the back of the board. (\$94)
