

SP.777: In-class check-in

28 Feb 2004

What part of the process was the most difficult so far? How could you have done better in this process? If you were starting again now, what would you do differently? In class? At the learning center? If you would not change, what did you like about how you did it?

Describe at least one thing you **don't like** about this class, and how we could fix it:
