L4: Enforced Modularity

Robert Morris

6.033 Computer System Engineering

```
public interface BidInterface extends Remote {  
    public String bid(String) throws RemoteException;  
}
```

```
public static void main (String[] argv) {  
    try {  
        BidInterface srvr = (BidInterface)  
            Naming.lookup("//xxx.ebay.com/Bid");  
        winning = srvr.bid("123");  
        System.out.println(winning);  
    } catch (Exception e) {  
        System.out.println ("BidClient exception: " + e);  
    }  
}
```
