

SP777 Assignment 8: Documentation

1 - Start thinking of all the steps we took in planning and production to get our designs/products to where they are now. We will make a list in class and divide up the written documentation. All of this is in preparation for the big PSDS presentation which will be Wed. May 4 at 7:30 pm.

2 - Think about names for our two products - what can we call these? Try to think of something descriptive and catchy, meaningful but fun.

The next two classes will be spent finishing our prototypes and creating good documentation.
