

HSSP Audio: Project Planning

If we each come up with one or two of these, maybe we'll find something we can all settle on.

Draw the setup – is it a pair of speakers? One nice speaker? A subwoofer? 2.1 system? Active or passive crossover?

Drivers and components you have in mind:

How about a driver size (1" tweeter, 5" mid, 8" woofer etc.), where to buy it, and the cost:

Driver Size	Name/description	Where to buy	Cost Each

What do we need to build? Which part are you most excited about?
